PROFILE

A dynamic and enthusiastic Computer Science graduate with a comprehensive skill set spanning various programming languages and computer science technologies. Proficient in database programming, web development, and desktop application development, with a proven ability to multitask effectively. Possessing a strong aptitude for problem-solving and a track record of successful collaboration with individuals from diverse backgrounds. Self-supported, driven, and committed to continuous learning and professional growth.

WORK EXPERIENCE

- **SENIOR MERN STACK, PHP, AND ASP.NET WEB DEVELOPER/ ENCODERBYTES (PVT)**

Senior Full Stack Web Developer proficient in MERN Stack (Front End and Back End) development, as well as ASP.NET and PHP development.

- Develop RESTful APIs
- Implement API handling and management for efficient data transmission
- Provide robust security measures for API endpoints to prevent unauthorized access
- Utilize encryption, authentication, and authorization techniques to enhance API security
- Establish connectivity with MongoDB for storing and retrieving data
- Design database schemas and models to optimize data storage and retrieval operations
- Implement CRUD operations to interact with MongoDB collections
- Utilize Mongoose.js for simplified interaction with MongoDB databases
- Perform data validation and sanitization to prevent injection attacks and ensure data consistency

.

- **MIS REPORTING AND DOTNET DEVELOPER / FF STEEL**

Having worked with the .NET Framework, I developed two software applications. The first is a backup file utility designed to securely manage and create backups of crucial files. The second application is a file renaming tool that streamlines the bulk renaming process for efficient file organization.

- **MERN Stack Web Developer at String Technologies**

"I am working with **String Technologies** to develop a project aimed at enabling the government to publish the Climate Impact Information Resource Book (CIR).

- **Teach MERN Stack courses through EBLearning, TeachRica, and Encoder Bytes.**

- **AS A INSTRUCTOR**

 I deliver MERN Stack courses at the Shaykh Zayed Islamic Centre, University of Peshawar, in collaboration with the National Vocational and Technical Training Commission (NAVTTC).

- **As an instructor at the Shaykh Zayed Islamic Centre under NAVTTC, I taught web development.**

- **I have also been personally conducting web development classes online using Google Meet for the past six months**

PROJECTS

- **BACKUP FILE SOFTWARE**

Using this software, I create a backup of the original files which is uploaded to SAP Software. The reason is that if the original file is deleted so we have already saved that file in the backup folder

- **SCALE SOFTWARE**

This software is used for taking the weights of the materials that are loaded into tractors and trucks, e.g. first weight and last weight. This first and last weight minus from each other the resultant weight is the material weight.

- **VIRTUAL BOOK SHOP WEBSITE**

This project was made for an online bookshop for their clients to buy books from them using mern.

- **MEDICINE SUPPLIERS WEBSITES**

This project was made to supply medicine for their clients to buy medicine from them using mern.

- **BULK FILE REMAINING SOFTWARE**

Using this software, Rename the original files to the created date of the file and store the old and new created names in the database.

- **(CIR) Climate Impact Information Resource (IIVE)**

I have developed a project intended for the government to publish the Climate Impact Information Resource Book (CIR) using mern.

- **E-commerce Web Application**

I have developed a Car Parts Selling web application using mern.

- **Alaqar-App (IIVE)**

I have developed a project intended for the company for property dealing using mern.
